

Gitennes Contracts Drilling Company for First Phase Diamond Drill Programme, New Mosher Gold Property, Chapais-Chibougamau area, Quebec

Vancouver, B.C., - April 6, 2021: Gitennes Exploration Inc. ("Gitennes" or the "Company") - (TSXV – GIT) announces that RJLL Drilling will conduct the Company's first phase of diamond drilling at the New Mosher gold property in the Chapais-Chibougamau area of Quebec (see Figure 2). The first phase of drilling is planned for a minimum of 2,500 metres and is expected to commence in mid-April. Diamond drilling will initially target areas of Induced Polarization, ("IP") high chargeability, geophysical anomalies that are associated with historic gold values in diamond drilling. The identified chargeability anomalies are similar in orientation and intensity to gold bearing structures at the nearby Joe Mann Mine. New Mosher is located three kilometres from the past producing, Joe Mann Mine which produced approximately 1.2 million ounces of gold at an average grade of 8.3 g/t gold₍₁₎ plus silver and copper.

The upcoming drill programme will be the first diamond drilling on the New Mosher Property since the late 1980's. Two previous drill programmes consisting of limited shallow drill holes intersected gold on two of the Gitennes IP anomalies. Many additional IP anomalies have been detected both historically and in a recent survey and will be tested with the present drill programme.

Diamond drilling in the 1980's intersected (see Anomaly A, Figure 1):

- **8.1 g/t gold over 0.25 metres;**
- **1.87 g/t gold over 5.1 metres**

In the mid-1950's drilling intersected gold in four of five holes (see Anomaly B, Figure 1):

- **3.40 g/t over 0.7m* at a down-hole depth of 65.2m,**
- **1.28 g/t over 3.0m* at a down-hole depth of 57.9m,**
- **0.87 g/t over 0.3m* at a down-hole depth of 41.7m and**
- **0.29 g/t over 0.9m* at a down-hole depth of 37.7m.**

Gitennes President Ken Booth commented "The Company is looking forward to the start of drilling later this month. This is Gitennes first drill programme on its Quebec properties which are well located in a region that is host to several past gold producers and various high profile gold exploration projects. Recent compilation work and geophysical surveys by Gitennes at New Mosher have revealed similarities between Joe Mann style mineralization, other gold mineralization in the area and the New Mosher Property. The Company is confident that the planned drill programme will greatly aid in the geological interpretation of the New Mosher Property and understanding the gold mineralization thus far located on the Property and will be used to plan additional drill programmes.

About Gitennes Exploration Inc.

Gitennes is in the business of exploring for and advancing mineral properties with a focus on high grade gold. The Company currently has four properties in Quebec: JMW, RAL, New Mosher and Maxwell, the Snowbird gold property in British Columbia and a 1.5% Net Smelter Return royalty on the 18 million ounce Urumulqui Silver Project in Peru. JMW and Maxwell are 100% owned by Gitennes. RAL and New Mosher are under option from Kintavar Exploration and Gitennes can earn an initial 70% and has the right to increase its ownership to 85%. The Snowbird Property was recently optioned to a gold exploration company.

Cautionary Note Regarding Forward-Looking Information

This news release includes certain statements that constitute "forward-looking information" within the meaning of applicable Canadian securities laws concerning the business, operations and financial performance and condition of the Company. All statements in this news release that are not purely historical are forward-looking statements and include any statements regarding beliefs, plans, expectations and orientations regarding the future. Often, but not always, forward-looking statements can be identified by words such as "pro forma", "plans", "expects", "may", "should", "budget", "schedules", "estimates", "forecasts", "intends", "anticipates", "believes", "potential" or variations of such words including negative variations thereof and phrases that refer to certain actions, events or results that may, could, would, might or will occur or be taken or achieved. Such forward-looking statements include, among others, statements as to the anticipated business plans and timing of future activities of the Company, including the exercise of any property Options and to conduct exploration activities thereon. Actual results could differ from those projected in any forward-looking statements due to numerous factors including risks and uncertainties relating to exploration and development and actual results of exploration activities; the ability of the Company to obtain additional financing; delays in obtaining governmental and regulatory approvals (including of the TSX-V), permits or financing; the need to comply with environmental and governmental regulations; potential defects in title to the Company's properties; fluctuations in the prices of commodities and precious metals; operating hazards and risks; environmental issues and liabilities; and competition and other risks and uncertainties of the mining industry. Although the Company believes that the beliefs, plans, expectations and intentions contained in this news release are reasonable, there can be no assurance that those beliefs, plans, expectations or intentions will prove to be accurate. Readers should consider all of the information set forth herein and should review the Company's periodic reports filed from time-to-time with Canadian securities regulators. These reports and the Company's filings are available at www.sedar.com.

Readers are cautioned not to place undue reliance on forward-looking statements. The forward-looking statements contained in this news release are made as of the date of this news release and, except as otherwise required by law, the Company undertakes no obligation to update the forward-looking statements contained herein, or to update the reasons why actual results could differ from those projected in these forward-looking statements.
